

LEED Canada Potential Points to be earned using

As manufacturers of premium quality, interior/exterior **ecocoat** recycled latex paint, we suggest looking into the following categories to earn points toward LEED certification.

MATERIALS & RESOURCES

- **Construction waste management (Credit 2):** Once your project has been completed, ensure any leftover latex paints are sent, or brought to Calibre Environmental for recycling into **ecocoat** recycled paint to assist you in earning up to **2 points**
- **Recycled content (Credit 4):** Made from 100% of post consumer recycled latex paints, **ecocoat** can assist your project in earning up to **2 additional points**.
- **Regional materials (Credit 5):** **ecocoat** is produced in Calgary, Alberta, so if you are within the prescribed distance, you may qualify for up to **2 points**.

ecocoat is made primarily from paint collected from municipalities in Western Canada

ecocoat is great for use in parkades

INDOOR ENVIRONMENTAL QUALITY

- **Low-Emitting materials- Paints & Coating (Credit 4):** Our product is a low VOC product; however, due to the nature of **ecocoat** paint, it is financially prohibitive to test each batch. To help you attain the Paints & Coatings point, if your project requires more than 1000 gallons of a single colour, we will produce and test a batch of **ecocoat** specifically for your project. Once low VOC content has been confirmed, you will be eligible to reach for the **1 point**

INNOVATION & DESIGN PROCESS

- **Innovation in design (Credit 1):** As an early adopter using **ecocoat** recycled paint for your LEED project, you may have the ability to reach for **up to 4 additional points**
